# CAPSTONE PROJECT SHOWCASE

Project Title

**Notes Sharing Web Application using Django Framework**

Abstract | Problem Statement | Project Overview | Proposed Solution |  
Technology Used | Modelling & Results | Conclusion

## Abstract

This project aims to develop a web application for sharing notes, built on the Django framework. The application will provide a platform where users can create, upload, view, and share notes with others. Users will be able to register for an account, log in securely, and manage their notes within the platform.

Additionally, the application will prioritize security measures to protect user data and ensure privacy. This includes implementing secure user authentication mechanisms, data encryption, and permission management to control access to notes.

Overall, the Notes Sharing Web Application will provide a convenient and secure platform for users to collaborate, exchange knowledge, and manage their notes effectively.

## Problem Statement

In today's fast-paced digital environment, individuals often encounter challenges when it comes to managing and sharing notes effectively. Whether it's students collaborating on group projects, professionals sharing insights from meetings, or hobbyists exchanging information, there's a need for a centralized platform that simplifies the process of note creation, organization, and sharing.

**Lack of Centralization:** Users face difficulties in finding a single platform that offers all the necessary features for creating, organizing, and sharing notes efficiently.

**Inadequate Security:** Existing solutions may lack sufficient security measures to protect user data, leading to concerns about privacy and confidentiality.

## Project Overview

In the realm of note-taking and sharing, users encounter several challenges that impede their productivity and collaboration efforts. These challenges include:

**Fragmented Tools:** Users often resort to using multiple applications or tools for note-taking, organization, and sharing. This fragmentation can lead to inefficiencies, as users must navigate between different platforms, each with its own interface and features.

**Security Concerns:** Many existing note-sharing platforms may lack robust security measures, leaving user data vulnerable to breaches or unauthorized access. Without proper encryption and authentication mechanisms, users may hesitate to share sensitive information via these platforms.

## Proposed Solution

The Notes Sharing Web Application built on the Django framework offers a robust solution to the challenges encountered in note-taking, organization, and sharing. Here's how the application addresses each problem:

### **Centralized Platform:**

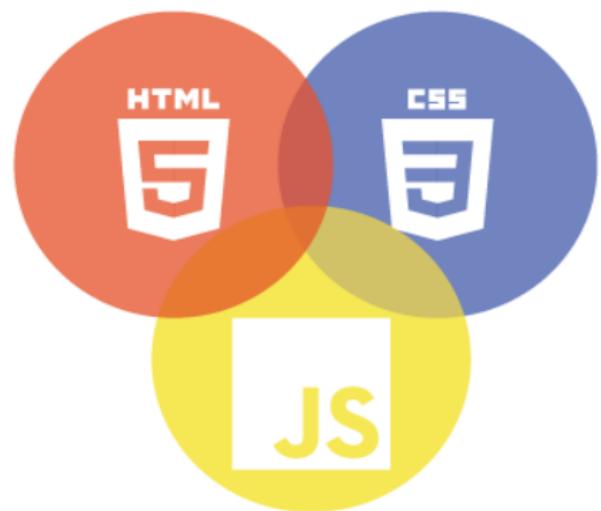

The application provides a unified platform where users can perform all note-related tasks, including creation, editing, organization, and sharing. This eliminates the need for users to switch between multiple tools or platforms.

### **Security Measures:**

Robust security measures are implemented to ensure the safety and privacy of user data. This includes encryption of sensitive information, secure authentication mechanisms (such as OAuth or JWT), and role-based access control to manage user permissions.

## Technology Used

Front-end

Back-end

## Modelling & Results

### **Modeling:**

#### **Database Modeling:**

The application's data model is designed using Django's built-in ORM (Object-Relational Mapping) to define the structure of the database tables.

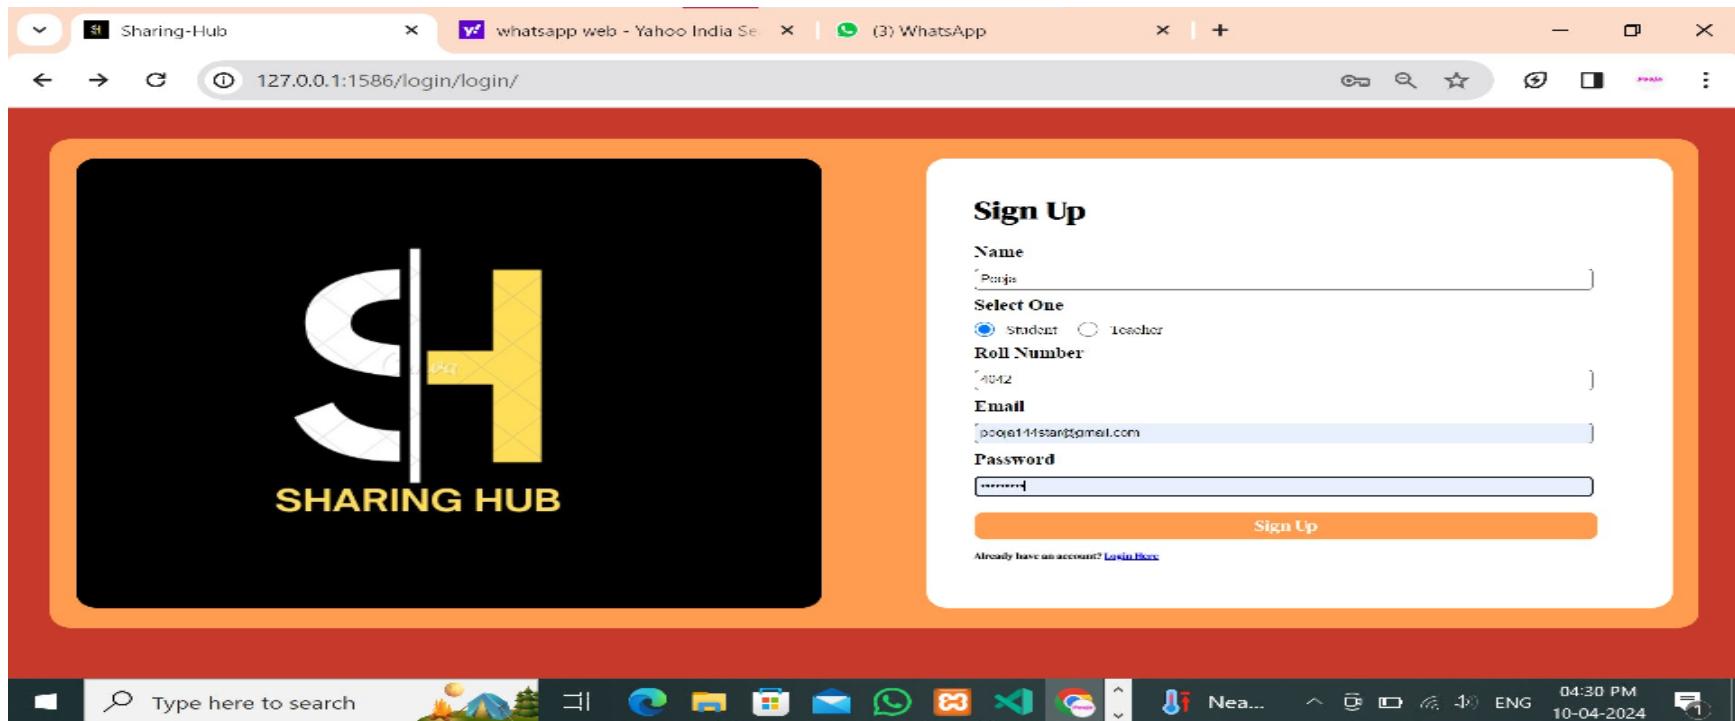

#### **Search and Organization:**

A powerful search functionality allows users to search for notes based on keywords, titles, categories, tags, or other criteria.

### **Results:**

The Notes Sharing Web Application built on the Django framework provides users with a centralized platform for creating, organizing, and sharing notes efficiently. Users can collaborate seamlessly on notes, track changes, and communicate with collaborators in real-time.

## Login page

The screenshot shows a web browser window with the URL `127.0.0.1:1586/login/login/`. The page has a red header bar with the text "Sharing-Hub". Below the header is a large black box containing the "SHARING HUB" logo, which features a stylized "S" and "H" in white and yellow, with the word "SHARING HUB" in yellow at the bottom. To the right of the logo is a white "Sign Up" form with an orange border. The form includes fields for Name (with "Punja" typed in), Select One (with "Student" selected), Roll Number (with "1042" typed in), Email (with "pobjet11@gmail.com" typed in), Password (with "#####" typed in), and a "Sign Up" button. Below the button is a link "Already have an account? [Login Here](#)". The browser's address bar shows other tabs like "Sharing-Hub", "whatsapp web - Yahoo India Se...", and "(3) WhatsApp". The taskbar at the bottom shows various pinned icons and system status.

## Student's login

The screenshot shows a Microsoft Edge browser window with three tabs open:

- Sharing-Hub
- whatsapp web - Yahoo India Se
- (3) WhatsApp

The address bar displays the URL `127.0.0.1:1586/login/login/`. The main content area features a large orange header with the "Sharing Hub" logo on the left and a "Login" form on the right.

**Sharing Hub Logo:** A black square containing a stylized white and yellow "SH" monogram, with the words "SHARING HUB" in white capital letters below it.

**Login Form:**

- Email:** Input field containing `pooja11star@gmail.com`.
- Password:** Input field containing `*****`.
- Forgot Password?** Link labeled "Click Here".
- Login:** Large orange button.
- Don't Have an Account?** Link labeled "Register Here".

The taskbar at the bottom of the screen includes icons for File Explorer, Microsoft Edge, Mail, and other system utilities. The system tray shows the date (10-04-2024), time (04:28 PM), battery level (1%), and weather information (38°C).

# Teacher's login

A screenshot of a web browser window titled "Sharing-Hub". The address bar shows the URL "127.0.0.1:1586/login/login/". The main content area features a large black box on the left containing a stylized "SH" logo and the text "SHARING HUB". To the right is a white sign-up form with an orange header. The form includes fields for Name (with placeholder "raju"), Select One (radio buttons for Student and Teacher, with Teacher selected), Teacher ID (text input "123"), Email (text input "raju@gmail.com"), Password (text input "\*\*\*\*\*"), and a large orange "Sign Up" button. Below the button is a link "Already have an account? [Login Here](#)". The browser interface includes standard navigation buttons and a taskbar at the bottom.

## No access

A screenshot of a Microsoft Edge browser window. The address bar shows the URL `127.0.0.1:1586/no_access/`. The main content area displays the words "NO ACCESS" in large, bold, black capital letters, centered on a white background with a red border. The browser's taskbar at the bottom shows various pinned icons and the system tray on the right indicating a temperature of 38°C, the date and time as 10-04-2024 04:35 PM, and network connectivity status.

## Future Enhancements

- Advanced Collaboration Features
- Integration with External Tools
- Enhanced Security Measures
- Mobile Application Support
- Offline Access and Synchronization
- Customizable Templates and Workflows
- Analytics and Insights
- Accessibility Features
- Community and User Feedback Integration

## Conclusion

The Notes Sharing Web Application developed on the Django framework presents a comprehensive solution to the challenges encountered in note-taking, organization, and sharing. By providing a centralized platform with robust security measures, advanced collaboration features, efficient organization tools, and a user-friendly interface, the application aims to streamline workflows, enhance productivity, and facilitate seamless knowledge sharing among users.

Overall, the Notes Sharing Web Application serves as a valuable tool for individuals, teams, and organizations seeking to streamline their note-taking processes, collaborate effectively, and harness the power of shared knowledge. Through continuous refinement and innovation, the application will continue to evolve and remain a vital asset for users in their quest for productivity and collaboration excellence.

**Thank You!**
